

C Programming

Unit 1

The screenshot shows the Programiz Online C Compiler interface. The code editor on the left contains a C program in `main.c` that calculates the area of a circle with a fixed radius of 1.1. The output window on the right shows the result: "Area of circle=3.799400".

```
1 #include<stdio.h>
2
3
4 void main()
5 {
6     float radius=1.1;
7     float area;
8
9     area=(3.14*radius*radius);
10    printf("\nArea of circle=%f",area);
11
12 }
```

Output:

```
Area of circle=3.799400
=== Code Exited With Errors ===
```

The screenshot shows the Programiz Online C Compiler interface. The code editor on the left contains a C program in `main.c` that calculates the area of a circle with a user-defined radius. The output window on the right shows the result: "Enter the radius of the circle:7" and "Area of circle=153.860001".

```
1 #include<stdio.h>
2
3
4 void main()
5 {
6     float radius,area;
7
8     printf("\n Enter the radius of the circle:");
9     scanf("%f",&radius);
10    area=(3.14*radius*radius);
11    printf("\n Area of circle=%f",area);
12
13 }
```

Output:

```
Enter the radius of the circle:7
Area of circle=153.860001
=== Code Exited With Errors ===
```
